PROFESSIONAL SUMMARY

Full Stack Developer with hands-on production experience in the MERN stack and Next.js. Built a 20+ block CMS engine used by marketing teams to publish pages without deployments, delivered a live procurement platform that consolidated 7 workflows for a freelance client, and shipped REST APIs integrated with CRM, WhatsApp Cloud API, and SMS services. Skilled in JWT authentication, role-based access control, API security, and collaborative Git workflows.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Vite, Tailwind CSS, Bootstrap, GSAP, Responsive Design

Backend: Node.js, Express.js, REST APIs, MongoDB, Mongoose, Prisma ORM, Socket.IO

Databases: MongoDB (Aggregation Pipelines), PostgreSQL, MySQL, SQLite, Redis

AI / LLM: Google Gemini API, Anthropic Claude API, Groq Cloud (Llama 3 / Mixtral), OpenRouter API Gateway

Security: JWT, Refresh Token Rotation, RBAC, OTP Authentication, bcrypt, Helmet, CORS, Rate Limiting

Integrations: CRM APIs (Brevo), WhatsApp Cloud API, SMS, Webhooks, reCAPTCHA v3, Puppeteer

Tools: Git, GitHub, CI/CD, Vercel, Render, Postman, Linux, Agile

WORK HISTORY

HOVSOL Technologies

Full Stack Developer

Dec 2025 – Present

India

Help Create Families (HCF) – Headless CMS and Surrogacy Platform | Live Site

Tech: Next.js 15, React 19, TypeScript, Node.js, Express.js, MongoDB

- Built a schema-driven block engine with 20+ page blocks, enabling marketing staff to create, reorder, and publish landing pages without code deployments.
- Developed an eligibility directory covering 50 US states plus DC with debounced search, tier filtering, pagination, and ARIA-compliant markup.
- Implemented a multi-step candidate screening quiz protected by reCAPTCHA v3, syncing submissions to Brevo and partner CRMs with audit logging.
- Secured the admin CMS with JWT refresh token rotation, idle-timeout renewal, and 3 permission roles (Admin, Editor, Read-Only).
- Delivered responsive layouts from 320px to 4K using GSAP ScrollTrigger animations and fluid CSS clamp() typography.

Enterprise Healthcare CMS Platform

Tech: React 18, Next.js 14, TypeScript, Node.js, Express.js

- Built a block-based CMS from scratch, replacing hardcoded pages so admins update content without developer involvement.
- Designed a JSON schema engine that maps admin-configured content to React components while enforcing brand design tokens.
- Developed an Express.js form-dispatch service integrating multiple CRM APIs by region and service type, with retry logic and webhook sync to prevent data loss during outages.
- Created a role-based admin portal in React (Vite) with live preview for managing directories, intake forms, and content.

Lab Information Management System

Tech: React, Node.js, Express.js, MongoDB

- Developed REST API controllers and access rules for 4 user types, enforced through JWT authentication and RBAC.
- Integrated WhatsApp Cloud API for an event-driven, opt-in notification system with feature toggles and non-blocking execution.
- Implemented the full booking lifecycle (creation, sample collection, report verification) and a mobile-first patient portal with OTP login.

KODBUD Solutions

ReactJS Development Intern (AICTE-approved, 4 weeks)

Nov 2025 – Dec 2025

Remote

- Built reusable React components using hooks (useState, useEffect, useContext) and integrated REST APIs for

real-time features.

- Resolved component-level bugs and improved UI responsiveness across the application.

PROJECTS

Dooars Green – FPO MCS Ltd. | Live | Frontend | Backend

May 2026 – Jul 2026

Freelance Full Stack Developer

Remote, India

Tech: React 18, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, Puppeteer, JWT

- Delivered a procurement and settlement platform as sole developer, from client requirements through deployment and handover; the system is live and in production use.
- Consolidated 7 operational workflows (merchant, factory, labor, buyer, payments, advances, reporting) into one React application backed by Express.js and Mongoose REST APIs.
- Implemented user-level data isolation by scoping every query to the authenticated user ID, keeping records, transactions, and invoices separate per account.
- Automated PDF invoice and statement generation with Puppeteer, including a serverless Chromium fallback for Vercel.
- Hardened security with JWT access tokens, rotating httpOnly refresh cookies, bcrypt, Helmet, CORS allowlisting, and rate limiting.

EasilyJob – Job Portal and Candidate Pipeline | Live | GitHub

2026

Personal Project

Tech: Node.js, Express.js 5, MongoDB Atlas, Prisma ORM, Socket.IO, EJS, JWT, Nodemailer

- Built a hiring platform with separate recruiter and job-seeker workspaces, multi-round interview pipelines, and private recruiter scoring.
- Implemented a transactional outbox for emails with idempotency keys and exponential-backoff retries, preventing duplicate or lost notifications.
- Developed real-time recruiter-candidate chat on Socket.IO with an HTTP POST fallback for serverless hosting.
- Secured the app with short-lived JWTs, rotating httpOnly refresh tokens, CSRF protection, Helmet, and rate limiting; enforced tenant isolation in queries to prevent IDOR.

Blog Application (Full Stack)

Sep 2025

Personal Project

- Built a blogging platform with authentication, CRUD operations, and RBAC using React, Node.js, Express.js, and MongoDB.

EDUCATION

Master of Computer Applications (MCA)

2022 – 2024

Future Institute of Engineering and Management, Kolkata

CGPA: 7.18/10

Bachelor of Computer Applications (BCA)

2019 – 2022

Prabhat Kumar College, Contai, West Bengal

CGPA: 9.30/10

CERTIFICATIONS AND AWARDS

- **Coding Ninjas** – Full Stack Web Development (Mar 2025 – Nov 2025): Backend Certificate, Frontend Certificate
- **KODBUD Solutions** – ReactJS Development Internship (Nov 2025 – Dec 2025): View Certificate
- **NPTEL Certification** – IIT/NPTEL Online Courses
- **Anthropic Certification** – Anthropic Claude 101 Certification
- **Team Player of the Year (2024)** – recognized for collaboration and contribution: View Certificate
